

Easy Yet Powerful IT Protection for Your Business

Safeguard Your Business, Stay Focused on Growth.

Running a small or medium-sized business comes with enough challenges—worrying about IT security shouldn't be one of them. Lunar is a simple, all-in-one solution designed to protect your business from cyber threats and keep your operations running smoothly.

IT Security Simplified

Finally, you can have the ability to keep your business safe and productive without the hassle of managing IT security issues yourself. Lunar combines essential technology services into one convenient package to take care of security, updates, and backups so you can focus on what matters most: growing your business.

What You Get

Constant Monitoring and Problem Prevention

We keep an eye on your technology 24/7 to fix small issues before they become big problems.

Protection from Cyber Threats

Our system detects and stops cyber threats before they can harm your business.

Antivirus Protection

Stops viruses and malware from slowing down your business and protects your sensitive data.

Automatic Updates for Your Software

We ensure all your important business programs are updated, keeping your systems safe and running smoothly.

Reliable Data Backups

If something goes wrong, we can quickly restore your important business files, so you never lose critical information.

Email Protection

Keeps harmful phishing emails out of inboxes, protecting your business from scams and cyber threats.

Step Up Your Security with Additional Enhancements

Employee Security Training

Captivating and easy-to-follow videos that teach your team how to avoid online scams and security risks.

Dark Web Monitoring

Alerts you if your business information is found on the dark web, so you can take action before it's too late.

24/7 Security Team

Our cybersecurity experts provide around-the-clock attended response for potential threats, ready to respond and protect your business.

Why Choose Lunaris?

All-in-One Protection

Everything you need to keep your business secure, all in one easy package.

Affordable & Scalable

A cost-effective solution that grows with your business.

Simple Management

No tech expertise needed—everything runs in the background, hassle-free.

Trusted by Businesses

Backed by leading security technology, giving you peace of mind.
